

NCT00324805-D3 Data Dictionary

E1505: A phase III randomized trial of adjuvant chemotherapy with or without bevacizumab for patients with n=3200 observations in dataset

This dataset can be used for the purpose of duplicating the results in Table 3 of the manuscript, as well as the toxicity table in the Supplement.

Variable name	Dictionary	Variable type	Codes/Values
blindid	Random case identifier	numeric	
type	adverse event coded term	character	
grade	worst grade adverse event	numeric	3, 4, or 5 as defined by CTCAE version 4.0
toxlabel	adverse event label	character	There is an error in the publication. The event labelled as "Enterocolitis" should be labelled as "Enterocolitis infections" - enterocolitis and enterocolitis infections are two different reportable types of events.
